

Hello, in this letter I want to share with you a little bit about me as a person and as a professional front end developer.

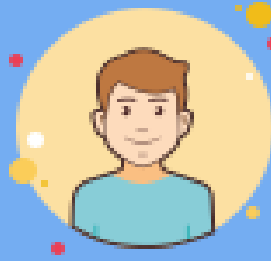

Firstly I am a young student of programming and a future software engineer, I'm still studying but now I got some interesting abilities that you might be interested like fluent management of CSS, Sass, Bootstrap, Javascript , React Js , Node js , express , databases like Mongodb and a good knowledge of Git repositories among others.

I'm a creative person that love make good design for the web and at the same time I like learn more in environment that I am, these are some of the attributes that I can share as a person and as developer

You can see more in the Cv in the next Page.

Thanks For Reading this and have a nice day.

Samuel D. Soto Luengo.
